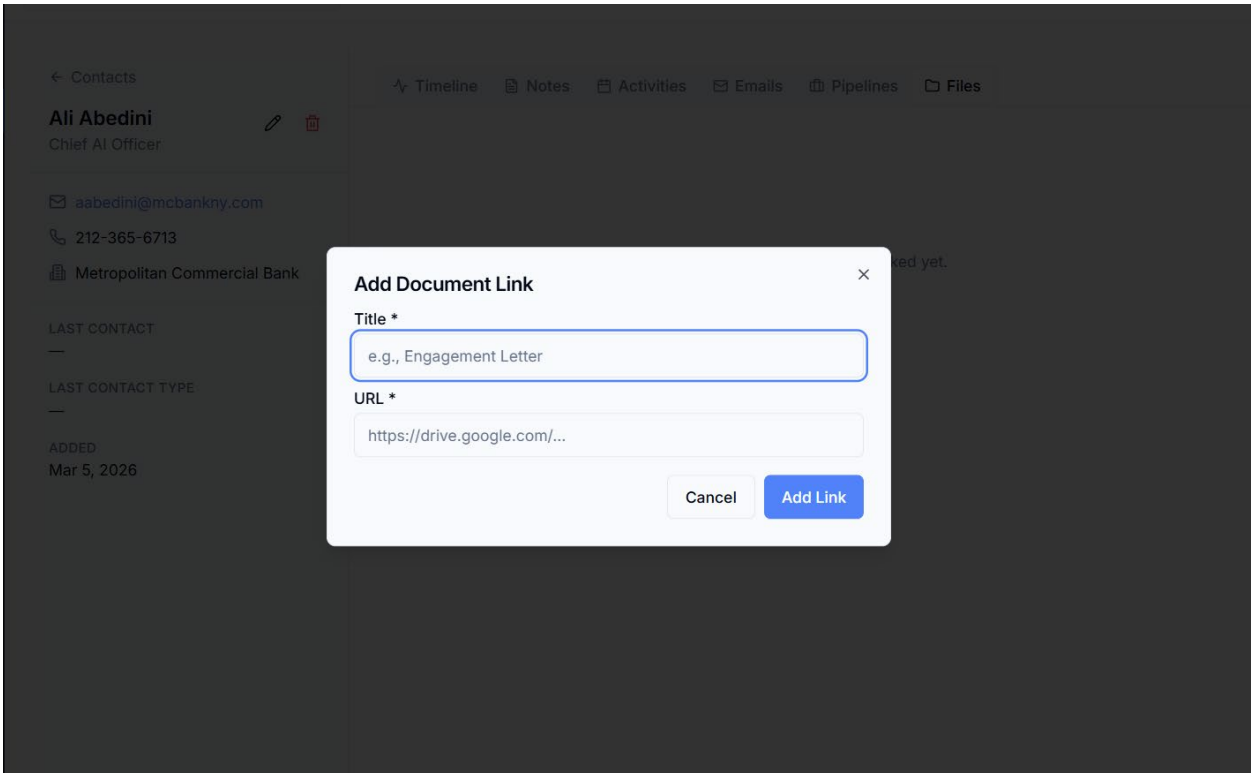
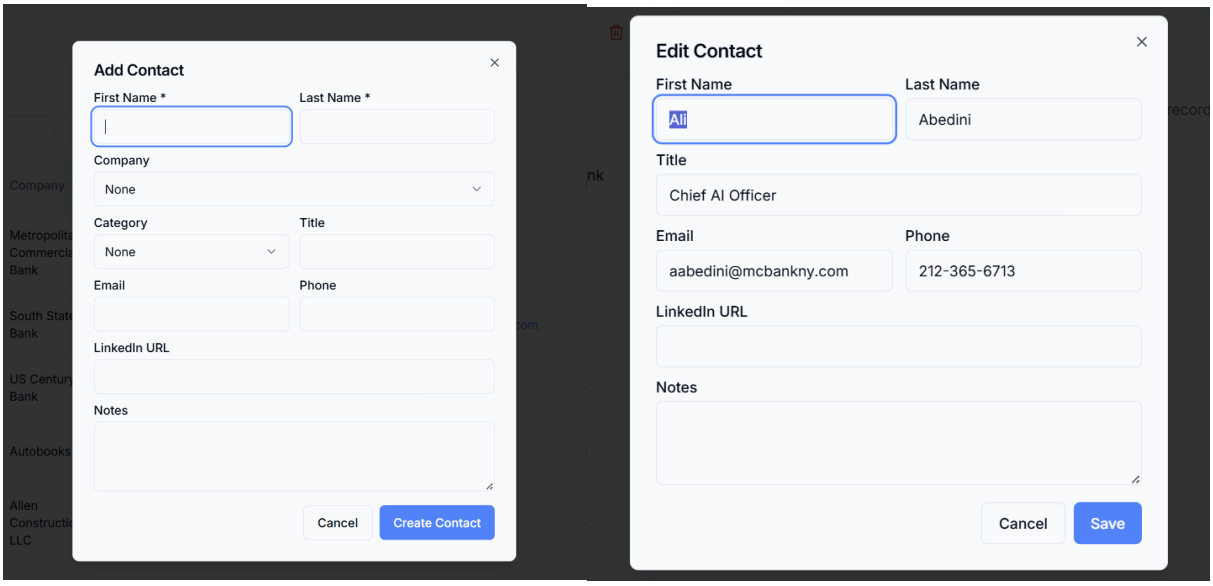
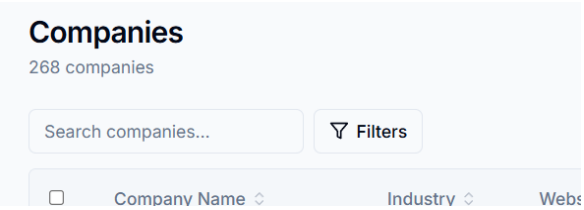
When I am adding files to a contact, I don't want to add a document link. I want to be able to add the files (e.g. Word Doc or PDF) directly into the contact's information.



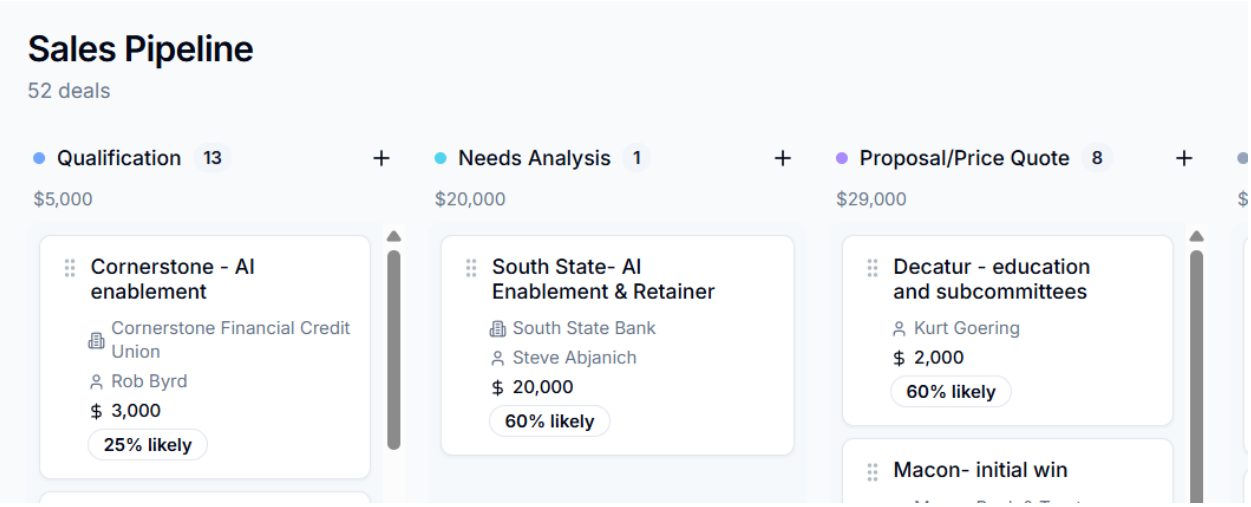
When I am creating or editing a contacts personal contact information I need to be able to include a location.



Can we add letter buttons along the top of the company list so that we can click on a letter and it pulls up the company/contact name so that I don't have to click through multiple pages when I'm looking for a "S" name

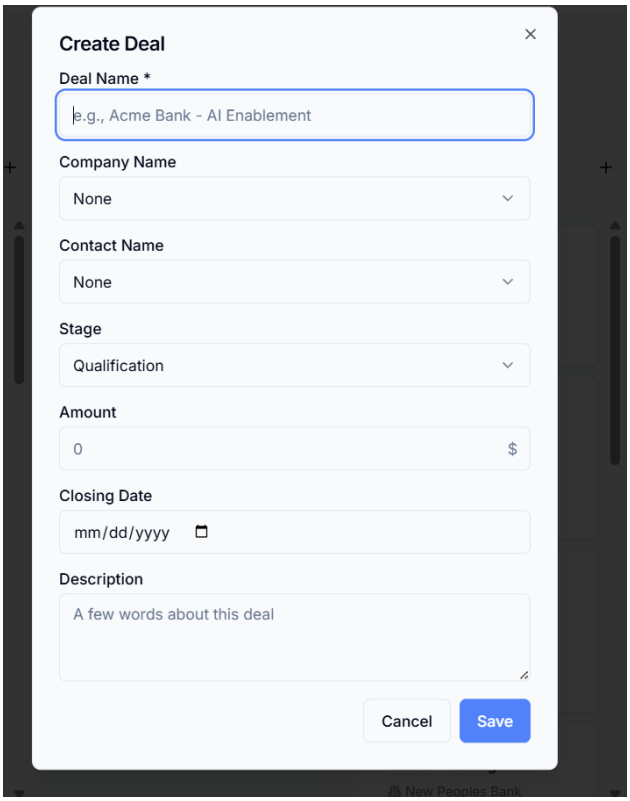


When I click on a pipeline deal on the Sales pipeline page, I want to be able to see details about that deal/contract. It currently redirects me to the contact person's page and I want to see the details about the contract such as number of meetings, scope of work, total contract price, invoicing schedule.

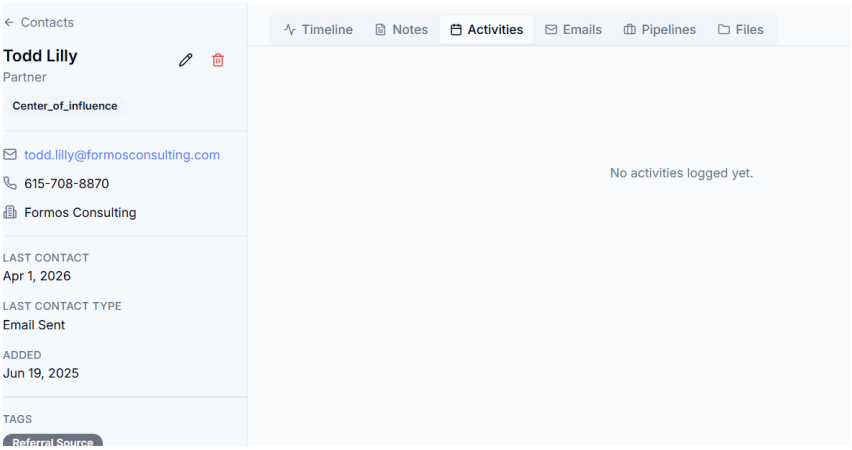


Pipeline closing date needs to be renamed. Follow up date would be better. We also need to have a notification that a pipeline deal needs to be followed up on because the date has passed with no changes.

We need an area to track deals that have been converted into a contract (The proposal/price quote stage) that shows the date a contract was sent to the client, and when we receive the countersigned contract. We also need a completion stage for the contracts of which the terms have been fulfilled. We need notifications on these items as well- a notification when we haven't received a countersigned contract within 7 days, and a reminder notification on these signed contracts/deal that have not had activity on them in 45 days but have not had contract terms fulfilled.



Invoices: I want to be able to associate invoices with a deal in the pipeline so I can track contract completion amount.In the example pictured below, this invoice was in fact sent to the client. I do not send invoices directly from Quickbooks

Invoice #	Company	Engagement	Invoice Date	Due Date	Total	Paid	Status	Balance
1016	BankMiami	—	03/27/2026	04/26/2026	$3,750.00	$0.00	Draft	$3,750.00


There should be an event on April 3 with him based on your calendar
